Let me first wish you all a very happy Christmas and a joyful and prosperous New Year.

If you and I are alive on this earth today, it is only due to the extreme love of God who created us and no doubt also due to the generosity and love of our parents who have allowed us to be born in this world. For it is the saying of many mothers or parents who consent to and commit abortion that “we are not in need of this Child”. Just Imagine for a second! Had our dad and mom also had thought in the above manner what would have been our fate and where would have now we been?

In our day today life, we read in the news papers that many people die due to natural calamities or due to accidents caused by natural faults or mistakes through oversight. On all these occasions ,we are prone to stand and observe a few minutes silence at the cross roads, parks, public places or at the most express our deep regrets, condolences and offer prayers by lighting the candles or smearing flowers for the repose of the souls so deceased. All these are good and a welcoming deed of concern and sympathy. But in all your life have you ever thought of or held silence or conveyed condolence even once in respect of those babies who are killed in the womb of their mothers as unwanted and undesired babies through abortions carried out with consent? As the studies say, in India, a country where religious minded and god fearing people live, about 11 million abortions are carried out in a year. Moreover, due to and by undergoing abortions, nearly 20000 young mothers too face death annually. These are statistics of known abortions carried out on an average. If it is so, what would be the estimated number of abortions which are carried out daily secretly without being brought to light to the world?

Another statistics estimates that nearly 210 million women conceive in a year in the whole world. Among these, 75 million conceptions are considered to be unwanted or undesired ones. 40 to 50 million women consent and express their willingness to undergo abortions. One of the main factors which determines as to whether a person is alive or dead is the heart beat. This very heart beat, a sign of life is found in the fetus of the babies too from the very moment of their conception in the womb of the mother. If it is so, is it fair and just to kill a fetus which has life but not able to speak, hear, see or protest against the injustice meted out to it through abortion.

The most important aim of this web site www.stopabortionsavelives.com is to bring under control the number of abortions carried out daily, even if it is not possible to completely put an end to abortion. Cordially and with great desire and expectations, I invite each and every one of you who are like minded to participate in this venture of propaganda against abortion. Unmindful of caste and creed we belong to, Let us join together to wage a war over this sinful, cruel and social evil and a inhuman deed which denies the right of the conceived babies to see the light of the day.

Let me finally remind you by quoting from Bible, the Word of God that "Thou shall not kill" which is the fifth commandment of the Ten Commandments that God has given to the human kind.

Once again I thank you all and hope to hear your supporting voices. God Bless you
